Message from the DIRECTOR

Despite energy crisis, economic recession, adjustments in the order quantity and raw materials prices, downward movement in product prices, our company has continued its sharp growth trend. Our unique setup, state of the art machineries, depth knowledge about markets, highly skilled & experienced manpower and financial strength help us to outperform the competition and continue to grow. As a continuous process of our extensive growth plan we introduced a new production unit emphasizing on Sports items.

From yarn sourcing to finished goods packing, we developed a strong monitoring system to maintain a standard desired level of quality. I believe everything like supply chain efficiency, planning, costing and on time delivery gets spoiled if the quality is not up to mark. That's why we have set quality standards for our factory following buyer's requirements and guidance for each departments and processes.

We are strongly committed to safeguard healthy and pollution free environment. In the process, we always maintain a very efficient waste collection and disposal system, in order to prevent air and water pollution. Our company only uses AZO free dyes & chemicals from world renowned sources. Our company already achieved the Global Organic Standard Certification from Control Union of Netherlands. This certificate allows us to manufacture garments by using organic cotton for leading retailers like C&A.

I would like to take the opportunity to show my appreciation and sincere gratitude to the employees, financial Institutions, suppliers and to our valued customer for their unforgettable co-operation. In fact, all are the real strength to overcome the different challenges. I am confident, with the help and support of you all we will continue to build on our capabilities for sustainable high performance in future.

Thanking you

Generator 900 & 500 KW	USA	Waukesha	02 SETS
Boiler (9.7 Tons)	USA	COCHRAN	01 SET
Compressor 125V; Motor Capacity 90 Kw	Belgium	Air Roll	02 SETS
Compressor 60V; Motor Capacity 45 Kw	Belgium	Air Roll	02 SETS
Generator 500 KBAR	UK	Perkins	01 SET
Condense Water Recovery System	INDIA	FORBES MARSHALL	01 SET

ETP

Cotton Club (BD) Ltd. & Tropical Knit Tex Ltd. maintains state of the art designed Effluent Treatment Plant (ETP) designed and commissioned by Euromac Ltd. ITALY.

ETP Inflow: 0-240m³/hr
ETP Outflow: 240m³/hr

Brand: Euromac Ltd, Italy
Supplier: ZMZ Associates Ltd,
Bangladesh
BUET Testified Report

Future Plan: Zero Discharge ETP

WATER MANAGEMENT

We are honestly trying to reduce dependency on underground water by developing -

- a) Rainwater harvesting Plant.
- b) Re use Machine cooling water & Steam condensate
- c) Establishing the control on water consumption in Process.
- d) Reuse of wash & surface water.

ENERGY SAVING

We are also working with the concept of green factory, we have already take many different measures to save energy like :

- a) Exhaust Gas boiler (EGB)
- b) Heat Recovery
- c) Replace Energy saving bulb
